DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2 and 12-20, drawn to a molecular sieve layer.

Group II, claim(s) 3-11 and 26, drawn to a method of preparing a molecular sieve layer.

Group III, claim(s) 21-23, drawn to a separation process.

Group IV, claim(s) 24-25, drawn to a catalytic process.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature which links the claims of Groups I-IV is a molecular sieve layer or membrane. However, this special technical feature is known – Refer to any of EP 0 511 739, EP 0 149 343, EP 0 481 660, or EP 0 135 069. Because the special technical feature does not define a contribution over the prior art, unity of invention is lacking and restriction between the groups is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
